## 单个输出和检测 var gulp = require('gulp'); var coffee = require('gulp-coffee'); gulp.src var uglify = require('gulp-uglify'); gulp.task('js', function(){ return gulp.src('./js/src/\*.coffee') coffee .pipe(coffee()) .pipe(uglify()) .pipe(gulp.dest('./js/')); }); uglify

gulp.task('watch', function(){

gulp.watch('./js/src/\*.coffee', ['js']);

## 多个输出

gulp.src

autoprefixer

gulp.dest

minify-css

rename

gulp.dest

```
var gulp = require('gulp');
var autoprefixer = require('gulp-autoprefixer');
var minifyCss = require('gulp-minify-css');
var rename = require('gulp-rename');
gulp.task('css', function(){
   return qulp.src('./css/src/style.css')
      .pipe(autoprefixer('last 2 versions'))
      .pipe(qulp.dest('./css/'))
      .pipe(minifyCss())
      .pipe(rename({extname: '.min.css'}))
      .pipe(gulp.dest('./css/'));
});
```

## 增量重新构建

```
gulp.src
  cached
  uglify
remember
                });
  conca
gulp.dest
```

```
var gulp = require('gulp');
var cached = require('gulp-cached');
var uglify = require('gulp-uglify');
var remember = require('gulp-remember');
var concat = require('gulp-concat');
qulp.task('script', function(){
  return gulp.src('./js/src/*.js')
      .pipe(cached())
      .pipe(uglify())
      .pipe(remember())
      .pipe(concat('app.js'))
      .pipe(gulp.dest('./js/'));
```

## 任务依赖

gulp.dest

```
gulp.task('css', ['font', 'less'], function(){
  // do something after font and less
```

\$ npm install -g gulp

全局安装

```
项目安装
$ npm install --save-dev gulp
$ npm install --save-dev gulp-other-plugins
```

运行任务 \$ gulp task name

\$ gulp task name other task

运行多个任务

只针对修改过的文件执行任务

```
var gulp = require('gulp');
var changed = require('gulp-changed');
var uglify = require('gulp-uglify');
gulp.task('css', function(){
   return gulp.src('./src/*.js')
      .pipe(changed('./dist/'))
      .pipe(uglify())
      .pipe(gulp.dest('./dist/'));
});
```
